April 25, 1991

Mr. Lance Jackson  
Interstate Brick Company  
9870 South 5200 West  
West Jordan, Utah 84088-5689

Dear Mr. Jackson:

Re: Approval of Amended Reclamation Plan, Interstate Brick Company, Cottonwood Pit, M/035/003, Salt Lake County, Utah

The Division has completed its review and evaluation of the amended reclamation plan received March 4, 1991, for Interstate Brick Company's Cottonwood Pit. This plan has been determined to be complete and is approved with the following two conditions:

- (1) The safety berm must be constructed of materials compacted in place in order to offer more resistance to possible slide debris.
- (2) The seed mix should incorporate two or more of the following shrubs into the mixture: mountain mahogany, serviceberry, cliff rose, bitterbrush or chokecherry.

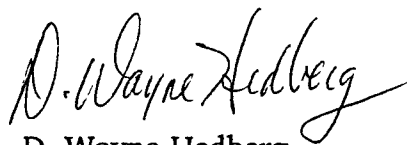

The regrading work could be performed this spring along with the seeding, although fall planting is recommended. In order for final reclamation release, this site must achieve a revegetation success of 70% of the premining vegetative ground cover. This may require a waiting period of up to three years. The Division will also be looking for signs of severe erosion and instability at the site during this waiting period.

Please inform us of your reclamation work schedule for this site. If possible, a member of the Division staff will inspect the site during the reclamation activities.
